Advancing Quality Healthcare for All ▪ www.cfhi.org

It is with great sadness that CFHI has learned of the sudden death of Mark Edward Stinson, MD. Over the years Dr. Stinson has contributed in countless ways to CFHI and many other organizations all with a view to improving healthcare. His considerable training and expertise in emergency medicine and disaster relief, especially in catastrophic situations, meant that he was often called upon by government and NGO organizations to be among the first on the ground in the wake of disasters both of natural and human origin.

Dr. Stinson had great energy for teaching future medical professionals and he was always happy to share with them the vast knowledge and experience he had gained by blazing many trails in international health. Mark's enthusiasm and expertise will be deeply missed and this has moved us to establish a fund to ensure that his legacy lives on.

Mark Edward Stinson Global Health Education Fund

Mark Edward Stinson, MD., CFHI volunteer and Board Member was a champion of advancing quality healthcare for all. He devoted his life to emergency medicine and was always ready, at a moment's notice, to travel to all parts of the globe to bring needed medical care in the worst of disasters. He was keenly interested in educating the next generation of healthcare professionals and to make sure that they had some experience and understanding of global health issues.

In memory of his tireless efforts, CFHI has established the Mark Edward Stinson Global Health Education Fund to continue his great legacy. The Fund will benefit CFHI's vision of advancing quality healthcare for all and specifically will assist with scholarships for underrepresented students in CFHI's Global Health Service Learning Rotations in Bolivia, Ecuador, India, Mexico, and South Africa as well as professional development opportunities for CFHI international grassroots partnerships.
